## 1. What is Quadrislim?

Quadrislim is botanical dietary supplements containing a complex mixture of phytochemicals which help in management of weight. It does not contain any added caffeine and is a natural way to lose weight. It increases your metabolism, curb your appetite, hunger, and fat cravings.

## 2. How does Quadrislim works?

**Alpha Cyclodextrin:** α-Cyclodextrin (α-CD) is a soluble fiber derived from corn. α-CD exerts its beneficial health effects on body weight and blood lipid profile in healthy nonobese individuals by decreasing the fat absorption in small intestine.

**Garcinia cambogia:** The active ingredient in the fruit's rind, hydroxycitric acid, or HCA, appears to block an enzyme called citrate lyase, which your body uses to make fat. It also raises levels of the brain chemical serotonin, which may make you feel less hungry.

**Piperine:** Piperine is the active ingredient in a commonly used spice in Indian kitchens - black pepper. Piperine helps to burn fat by virtue of its metabolism-boosting properties. It also has

a thermogenic effect – it causes the body to increase its temperature by producing energy from utilizing the fat.

**Chromium picolinate:** Due to chromium's role in nutrient metabolism and possible effects on eating behaviour, it is an effective weight loss supplement.
