

Lactobacillus Plantarum DA 7	
Lactobacillus Rhamnosus GG-LATCC 53103	together 1 billion CFU
Vitamin C	40mg
Zinc as Zinc Sulphate Monohydrate	12mg
Vitamin D ₃	400IU

1. What is Imusmile Pro?

Imusmile Pro is a rational combination of probiotics, vitamins and minerals that help body defend against viruses, bacteria etc by enhancing the resistance to infections, restoring the immune function.

2. How does Imusmile Pro works?

Protects person from common colds, flu or other URTIs, boosting the immune response and reducing its main symptoms by acting on various parameters of immunity

Imusmile pro contains microorganisms that have been reported to stimulate immune responses that prevent certain allergic symptoms.

Vitamin C contributes to immune defence by supporting various cellular functions of both the innate and adaptive immune system. Reduce the signs and symptoms of allergic rhinitis.

Zinc regulates functions of immune system.

Vitamin D₃ decreases susceptibility to respiratory infections.

3. Who should take Imusmile Pro?

Imusmile Pro is a supplement for person with recurrent respiratory infections to enhance resistance to infections.

4. What is recurrent respiratory infections?

Common symptoms of respiratory tract infections include fever, cough, runny nose, nasal congestion, malaise, shortness of breath etc.

When such episode of respiratory tract infection occurs frequently, it is known as recurrent respiratory tract infections.

For person to be diagnosed with RRTI, at least one of the following criteria has to be present:

- ≥ 6 respiratory infections per annum
- ≥ 1 respiratory infection per month involving the upper airways from September to April
- ≥ 3 respiratory infections per annum involving the lower airways

5. What are the precautions to be taken while using Imusmile Pro?

No special precautions are required while using Imusmile Pro. Only if you are hypersensitive or allergy to any of the contents, do not use Imusmile Pro and inform the health care professional.

6. How to take Imusmile pro

One capsule per day after meal. To be taken with water at room temperature.

7. How long one must take Imusmile Pro?

Imusmile Pro is to be taken as long as directed by health care professional

8. Can Imusmile Pro replace antibiotics and cold/allergy medicines during acute episode of RTI?

Imusmile Pro is not a substitute to mainstay therapy. It is used along with other medication for treatment of RTI.

9. Will there be relapse of RTI or RTI with more severity after stopping Imusmile Pro?

Clinical trials with Imusmile Pro support its effectiveness in enhancing the resistance to infections, restoring the immune function. But there are no clinical trials on relapse or preventing the relapse in RTI.

10. Are there side effects with consumption of Imusmile Pro?

Side effects with Imusmile Pro are usually mild and well tolerated. Few people may experience unpleasant digestive symptoms like gas and bloating.

11. Who can take Imusmile Pro?

Adult population with recurrent respiratory tract infections.

12. How to store Imusmile Pro?
