1. What is Otopap VT?

Otopap VT is a supplement containing antioxidant, vitamins, minerals and phytochemicals that helps you maintain balance & prevent dizziness and ringing sensation in ears. Most of the ingredients in Otopap VT are GRAS.

2. How does Otopap VT works?

Otopap VT is a health supplement that can help reduce the severity and frequency of vertigo and Tinnitus. Vertigo and tinnitus are conditions related to reduced blood flow and an increased oxidative stress because of free radicals in inner ear. Combinations of vitamins and minerals in Otopap VT helps to block the activity of cell-damaging free radicals.

Ginseng contains active ingredients known as ginsenosides, which have been shown to improve the symptoms of vertigo by increasing blood flow in the brain.

Alpha Lipoic acid (ALA) is a potent antioxidant with anti-inflammatory activity.

Ginkgo biloba resolves the symptoms of vertigo by managing blood flow to the brain to relieve dizziness and balance issues. Also, it improves blood flow to inner ear.

The role of vitamin D in the inner ear diseases may be related to calcium metabolism, fluids, and nerve transmission impairment leading to the degeneration of auditory structures, demineralization of the cochlea, cochlear sensitivity to chronic ischemic effects, and lysosomal enzymes imbalance.

3. Who should take Otopac VT?

Otopac VT is a supplement suitable for person who has ringing sensation in the ear (tinnitus) and Vertigo of all origins.

4. What is exactly is vertigo and tinnitus?

Tinnitus is a very prevalent condition, defined as a perception of sound or noise in the absence of an external source. It can occur in association with several disorders, including otologic diseases, acoustic trauma, metabolic and neurological diseases, or stress; however, most of the cases remain idiopathic.

Vertigo is a medical condition where a person feels as he/she or the objects around them are moving when they are stable and not moving. It is mainly occurs due to defects in the inner ear. Acute unilateral vestibular loss can have great impact, because it instantaneously leads to spontaneous horizontal rotatory nystagmus, rotatory vertigo attack along with postural imbalance, vomiting and nausea.

5. What are the precautions to be taken while using Otopac VT?

There are no precautions to be taken.

6. How long one must take Otopac VT?

One can take one capsule per day as directed by the Physician.

7. Will Otopac VT reverse the symptoms related to Tinnitus and Vertigo?

Otopac VT has unique blend of ingredients that act by blocking the activity of cell-damaging molecules in ear. Thus, help to improve the condition and prevent further progression.
