

# Sinarest-S<sup>®</sup>

---

## **Composition:**

Sodium Chloride 0.7%w/v.

## **Pharmacokinetic properties:**

Sodium chloride is well absorbed from the gastrointestinal tract. Excess sodium is mainly excreted by the kidney, and small amounts are lost in the faeces and sweat. A 0.9% solution in water is iso-osmotic, and thus in most cases isotonic with serum and lacrimal secretions. Nasal drops of sodium chloride 0.9% are used to relieve nasal congestion.

## **Mechanism of Action**

- Sinarest-S nasal solution is effective in restoring moisture to nasal membranes affected by dryness due to climate, respiratory infections, travel, oxygen therapy, overuse of nasal decongestants, and hormonal changes caused by pregnancy.
- It aids in eliminating congestion by washing away mucus and allergens from the nose and sinuses.
- It is soothing, non-irritating solution, which is formulated to be compatible with nasal membranes to prevent the stinging, burning and irritation of delicate nasal tissue.
- Solution is buffered to a neutral pH to loosen and thin congestion caused by colds or allergies. Restores moisture to dry nasal membranes.

## **Other pharmacodynamic properties:**

Sodium, the major cation of the extracellular fluid, functions primarily in the control of water distribution, fluid balance, and osmotic pressure of body fluids. Sodium is also associated with chloride and bicarbonate in the regulation of the acid-base equilibrium of body fluid. Chloride, the major extracellular anion, closely follows the metabolism of sodium, and changes in the acid-base balance of the body are reflected by changes in the chloride concentration.

## **Indication:**

Sinarest-S nasal solution is indicated in blocked, dry, crusty and itchy nose.

## **Contraindication:**

There no contraindications for Sinarest-S nasal solution.

## **Drug Interaction:**

No drug interactions for Sinarest-S nasal solution are noted.

## **Adverse effects:**

*We Impart Health to Life*

There no adverse effects for Sinarest-S nasal solution

**Warnings and Precautions:**

There are no specific precautions for Sinarest-S nasal solution. It can be used as often required.

**Use in special population:**

1. **Pediatric:** Safe.
2. **Geriatric:** Safe.
3. **Liver impairment:** Safe.
4. **Renal failure:** Safe.
5. **Pregnancy and lactation:** Safe.

**Dosage:**

Tilt head back; apply 2 to 6 drops of Sinarest-S nasal solution in each nostril every 2 hours as needed or as directed by doctor.

**Presentation:**

Sinarest-S nasal solution is available in 15ml plastic bottle with in build nozzle.

**Storage and handling:**

Store in cool and dry place.
