

SINAREST VAPOCAPS

Composition

Each **SINAREST Vapocap** contains:

Camphor	25 mg
Chlorothymol	5 mg
Eucalyptol	125 mg
Menthol	65 mg
Terpineol	120 mg

Pharmacology

SINAREST Vapocaps contain aromatic ingredients that provide relief from various respiratory ailments.

- ☞ Camphor applied externally acts as a rubefacient and mild analgesic. It is also a principal ingredient of many nasal decongestants for inhalation.
- ☞ Menthol is chiefly used to relieve symptoms of bronchitis, sinusitis and similar conditions. For this purpose, it may be used as an inhalation or as an ointment with camphor and eucalyptus oil for application to the chest and nostrils.
- ☞ Eucalyptus oil has been used as an inhalation often with other volatile substances. Eucalyptol kills bacteria and eases breathing difficulties in people with croup, asthma and bronchitis. It is also used externally for chest congestion, to ease aches and pains, and as a deodorant.
- ☞ Terpineol has anti-infective properties.
- ☞ Chlorothymol is a multipurpose phenolic antiseptic. It finds special use in symptomatic relief from common cold.
